To whom it may concern,
Isn't this was a free market society is all about? The freedom of choice? If the broadcasters provide content that is superior to that being offered by XM Satellite Radio, then they needn't worry. However, we, as paying subscribers, should not be denied the freedom of choice when it comes to listening to sources that provide benefits that fit our needs.

Please reject the petition brought forth by the NBA (04-160) as this flies in the face of one of the things America is all about. Freedom.

Thanks,

- Ed.
